Daily Model Brief, November 16, 2026

Alibaba priced its new Qwen4-Max flagship at $1.50 input and $4.50 output per million tokens, 25% below Qwen3.8-Max, and Google pushed several preview speech model shutdowns back to December 18. No vendor changed a list price on an existing tracked model since Friday.

Monday, November 16, 2026 · Prices as of 8:50 AM CT · Covers Friday, November 13 through this morning

Executive Summary

Alibaba published prices for Qwen4-Max (`qwen4-max`), which its Model Studio documentation now lists as its latest model: a multimodal flagship for coding, office work, frontend design and agentic tasks, with a 1M-token context window. In the International (Singapore) region it costs $1.50 input and $4.50 output per million tokens across the full window, in both thinking and non-thinking modes. That is 25% below Qwen3.8-Max, which stays at $2.00 and $6.00. Cache reads cost $0.075, and explicit cache writes cost $1.875 (5-minute) or $3.00 (1-hour). New users in Singapore get 1 million free tokens, valid for 90 days. In Alibaba's other listed regions it costs $1.413 input and $4.24 output. The earlier `qwen4-max-preview` still has no published price.

Google moved the shutdown of its preview speech models `gemini-3.1-flash-tts-preview`, `gemini-2.5-flash-preview-tts` and `gemini-2.5-pro-preview-tts` from Tuesday, November 17 to Friday, December 18. It also moved `gemini-2.5-flash-native-audio-preview-12-2025` to Wednesday, March 31, 2027, and now lists no shutdown date for `gemini-3.1-flash-live-preview`. The recommended replacements are unchanged: `gemini-3.8-flash-tts` or `gemini-3.8-flash-lite-tts` for speech, and `gemini-3.8-live` for live audio.

No vendor I track changed a standard list token price on an existing publicly available text or chat model since Friday's brief.

StepFun pushed the end of the free period for its StepAudio 3 voice models back six days, to 10:00 PM CT on Sunday, November 22 (noon on November 23, China time). The prices that follow are unchanged: $0.125 per session minute for realtime speech and $14.00 per million input characters for text to speech.

Microsoft moved the Azure retirement of Claude Opus 4.5 and Claude Haiku 4.5 to Monday, February 22, 2027, and now names `claude-opus-5-5` and `claude-haiku-5-5` as their replacements. These dates apply to Microsoft Foundry deployments, not Anthropic's own API.

Tencent's model list now includes Hy4 Flash (`hy4-flash`), with no price published, and marks Hy4 Preview (`hy4-preview`) as to be discontinued, with no date given.

Last week's releases stand at their launch prices. Gemini 4 Hydrogen (`gemini-4-hydrogen`) costs $1.50 input, $0.075 cached and $7.50 output per million tokens, with output including thinking tokens and the price flat across its 1M-token window; Batch and Flex cost half. DeepSeek's application APIs keep search and web fetch at $0.75 per 1,000, file parsing and OCR at $0.225 per 1,000 pages, text to speech at $0.45 per 10,000 characters and speech to text at $0.116 per hour, with both speech prices 50% off for a limited time. Gemini Decision (`gemini-decision-1`) bills $0.10 per million input tokens with zero output tokens. Gemini 4 Carbon and Gemini 4 Argon cost $2.00 input, $0.10 cached and $10.00 output through November 30, then $4.00, $0.20 and $20.00 from Tuesday, December 1. Claude Fable 5.2 (`claude-fable-5-2`) costs $8.00 input, $0.20 cached and $40.00 output, and Meta's Muse Ember 1.0 (`muse-ember-1.0`) costs $0.10 input, $0.004 cached and $0.50 output up to 200K tokens.

OpenAI's deprecations page still names `gpt-6.1-sol`, `gpt-6.1-terra` and `gpt-6-luna` as the replacements for the models it shuts down on Friday, December 11, including `gpt-5`, `gpt-5-mini`, `gpt-5-nano` and `o3`. GPT-5.6 Sol (`gpt-5.6-sol`) remains at its promotional $4.00 input, $0.40 cached and $20.00 output through November 30, with no post-promo price published.

MiniMax's H3-Image models are unchanged at $2.30 text input per million tokens, with 4K images at 50% off until 10:00 AM CT on Tuesday, November 17. These are image models, not a change to a tracked chat price.

Tencent still lists Hy4 (`hy4`) at $0.834 input, $0.042 cached and $2.501 output per million tokens in its documentation, billed at 50% of list through the end of December 31, 2026, Beijing time (9:59 AM CT on Thursday, December 31). Its main price list could not be confirmed today.

Google's earlier notices stand: requests to `gemini-embedding-2-preview` already route to `gemini-embedding-2`, and from Tuesday, December 1, `gemini-2.5-pro` routes to `gemini-3.8-flash` and `gemini-2.5-flash` to `gemini-3.5-flash-lite`, each billed at the new model's rates.

Moonshot still has `kimi-k2.7-code`, `kimi-k2.7-code-highspeed` and `kimi-k2.6` on its deprecated list, closed to newly registered accounts, with retirement expected in late December 2026 and no exact date.

Dates coming up: MiniMax's 4K image discount ends at 10:00 AM CT on Tuesday, November 17, and Microsoft retires Llama 4 Maverick on Azure on Thursday, November 19. StepFun starts billing its StepAudio 3 voice models at 10:00 PM CT on Sunday, November 22. Fast mode for Claude Opus 4.8 is removed and GPT-5.6 Sol's promotional price ends on Monday, November 30. On Tuesday, December 1, Gemini 4 Carbon and Gemini 4 Argon prices double, Gemini 2.5 Pro and 2.5 Flash requests start routing to newer models, and OpenAI shuts down the gpt-image-1.5, gpt-image-1-mini and chatgpt-image-latest image models. OpenAI's GPT-5 and o3 shutdowns follow on Friday, December 11, and Google's preview speech models shut down on Friday, December 18.

Items from earlier briefs still stand: Mistral Large 4 (`mistral-large-4`) is generally available at $0.70 input and $2.10 output; Mistral Medium 3.5 and Mistral Large 3 retire on Friday, April 30, 2027; and OpenAI's 10% uplift on FedRAMP endpoints continues.

Not confirmed today: Amazon prices, Tencent's main price list, Moonshot's per-search web search prices, IBM's model list, and Microsoft, which lists no pay-as-you-go prices. Their last confirmed prices stand. Performance scores in the chart are still as of October 16 and have not been refreshed since.

What This Means for Customers

- If you run `qwen3.8-max` in Alibaba's International region, test `qwen4-max`. It lists 25% lower on input and output ($1.50 and $4.50 against $2.00 and $6.00), and the saving only applies once you change the model string.
- If you use Alibaba's explicit caching with `qwen4-max`, a 1-hour cache write costs $3.00 per million tokens against $1.875 for 5 minutes, so keep the shorter setting unless prompts are reused over a longer window.
- If you still call `gemini-3.1-flash-tts-preview` or the Gemini 2.5 preview speech models, you now have until Friday, December 18 to move to `gemini-3.8-flash-tts` or `gemini-3.8-flash-lite-tts`.
- If you build on StepFun's StepAudio 3 voice models, the free period now ends at 10:00 PM CT on Sunday, November 22. Realtime speech then bills at $0.125 per session minute, counted by the second, and text to speech at $14.00 per million input characters.
- If you run Claude Opus 4.5 or Claude Haiku 4.5 on Microsoft Foundry, plan the move to `claude-opus-5-5` or `claude-haiku-5-5` before Monday, February 22, 2027.
- If you call `mistral-large-4` with `reasoning_effort` set to `none`, those requests return an HTTP 400 error. Mistral says the model always reasons; use `low` for the least reasoning.
- If you run `gemini-3.8-flash` for coding or agent work, test `gemini-4-hydrogen`. Its $1.50 input and $7.50 output are double 3.8 Flash's $0.75 and $3.75 through December 31, but match the price 3.8 Flash moves to on January 1, 2027. Hydrogen's output price includes thinking tokens, so compare cost per task, not per token.
- If you send `deepseek-flash` traffic through a gateway, check whether requests turn on the `deepseek_web_search` or `deepseek_read_url` tools. Each search or page fetch the model runs bills at $0.75 per 1,000 on top of tokens.
- If you still call `gpt-5`, `gpt-5-mini`, `gpt-5-nano` or `o3`, test `gpt-6.1-sol`, `gpt-6.1-terra` and `gpt-6-luna` before Friday, December 11.
- If you budget for either Gemini 4 model, plan for December 1. Input, cached and output prices all double that day, from $2.00, $0.10 and $10.00 to $4.00, $0.20 and $20.00 per million tokens.

- If you call `gemini-2.5-pro`, test `gemini-3.8-flash` before Tuesday, December 1. At today's list prices the routed requests cost less per token ($0.75 input and $3.75 output through December 31, against 2.5 Pro's $1.25 and $10.00 for prompts up to 200K tokens), but 3.8 Flash rises to $1.50 and $7.50 on January 1, 2027.
- If you call `gemini-2.5-flash`, requests move to `gemini-3.5-flash-lite` on December 1 at the same text list price ($0.30 input, $0.03 cached, $2.50 output). Test the new model first.
- If you rely on `gpt-5.6-sol`, plan for November 30. Its promotional price runs through that date and OpenAI has not published what it costs afterward.
- If you still use Moonshot's K2 models, plan the move to `kimi-k3.1-pro` by December 1. New accounts cannot use K2, and Moonshot expects to retire it in late December.
- If you use fast mode on `claude-opus-4-8`, those requests will return an error after November 30. Move fast-mode work to `claude-opus-5-5`, or drop the fast setting.

New Models and Price Changes

Prices in USD per 1M tokens.

Vendor	Model ID	Status	Input	Cached	Output
Alibaba	`qwen4-max`	New. Price listed Mon Nov 16; Alibaba's latest model. International (Singapore) region; same price in thinking and non-thinking modes across the 1M-token context window. Cache writes: $1.875 (5-minute) or $3.00 (1-hour). Free quota of 1 million tokens for new Singapore users, valid 90 days. Other listed regions: $1.413 input / $4.24 output.	$1.50	$0.075	$4.50
Tencent	`hy4-flash`	Watch item. Newly listed in Tencent's model list. No price published yet. Hy4 Preview (hy4-preview) is now marked to be discontinued, with no date.	Not listed	Not listed	Not listed
Google	`gemini-4-hydrogen`	Unchanged. New Thu Nov 12, generally available. Output includes thinking tokens. Implicit caching only. Flat price across the 1M-token context window. Batch and Flex: $0.75 / $0.0375 / $3.75. Priority: $2.70 / $0.135 / $13.50. Free tier offered.	$1.50	$0.075	$7.50
DeepSeek	`File parsing and OCR API`	Unchanged. New Fri Nov 13. $0.225 per 1,000 pages.	Per page	Not applicable	Not applicable
DeepSeek	`Text to speech (TTS) API`	Unchanged. New Fri Nov 13. $0.45 per 10,000 characters; limited-time price $0.225 (50% off), no end date stated.	Per character	Not applicable	Not applicable
DeepSeek	`Speech to text (ASR) API`	Unchanged. New Fri Nov 13. $0.116 per hour of audio; limited-time price $0.058 (50% off), no end date stated.	Per hour	Not applicable	Not applicable
Google	`gemini-decision-1`	Unchanged. New Wed Nov 11. Decisions API only. Input covers text, image, video, audio and PDF; zero output tokens. No context caching; no Batch API. Free tier offered.	$0.10	Not available	Not applicable
Alibaba	`qwen4-max-preview`	Watch item. Earlier preview of Qwen4-Max. No price published yet.	Not listed	Not listed	Not listed

Vendor	Model ID	Status	Input	Cached	Output
Google	`gemini-4-carbon`	Unchanged. Listed Tue Nov 10. Introductory price through Nov 30; from Tue Dec 1: $4.00 input / $0.20 cached / $20.00 output. Output includes thinking tokens. Implicit caching only. Paid tier only. Context window of 1M tokens.	$2.00	$0.10	$10.00
Google	`gemini-4-argon`	Unchanged. Same prices as Gemini 4 Carbon, including the Dec 1 step to $4.00 / $0.20 / $20.00.	$2.00	$0.10	$10.00
Anthropic	`claude-fable-5-2`	Unchanged. Listed Mon Nov 9. Cache writes: $10.00 (5-minute) or $16.00 (1-hour). Full 1M context at standard pricing; 128K max output. Fast mode: $16.00 input / $80.00 output. Fable 5.1 unchanged at $10.00 / $50.00.	$8.00	$0.20	$40.00
Meta	`muse-ember-1.0`	Unchanged. Listed Mon Nov 9. Prompts up to 200K tokens. Over 200K the whole request bills at $0.30 input / $0.012 cached / $1.50 output. No cache-write price published. Web search grounding $2.50 per 1,000 queries.	$0.10	$0.004	$0.50
Anthropic	`claude-mythos-5-2`	Unchanged. Same prices as Fable 5.2, limited to organizations Anthropic has verified.	$8.00	$0.20	$40.00
MiniMax	`MiniMax-H3-Image`	Unchanged. Image model listed Nov 10. Text input $2.30, image input $1.50, image output $3.80. Highspeed version: $2.30 / $3.00 / $7.60. Images at 4K are 50% off until Tue Nov 17, 10:00 AM CT.	$2.30	Not listed	$3.80
OpenAI	`gpt-5.6-sol`	Unchanged. Promotional price through Nov 30; not in OpenAI's main price table. No post-promo price published.	$4.00	$0.40	$20.00
StepFun	`stepaudio-3-realtime`	Free period extended to Sun Nov 22, 10:00 PM CT (12:00 PM Nov 23, China time); price unchanged: then $0.125 per session minute, billed by the second, partial seconds billed as full seconds.	Per minute	Not applicable	Per minute
StepFun	`stepaudio-3-tts`	Free period extended to Sun Nov 22, 10:00 PM CT; price unchanged: $14.00 per million billable input characters. Voice cloning or design: $1.50 per voice.	Per character	Not applicable	Not applicable
Google	`gemini-embedding-2-preview`	Unchanged. Deprecated Fri Nov 6. Requests route to gemini-embedding-2 and bill at Gemini Embedding 2 rates.	See status	See status	See status
Alibaba	`qwen-audio-3.1-asr-flash`	Unchanged. Listed Nov 9 (international). qwen-audio-3.0-asr-flash: $0.000035 per second of input audio, output free.	$0.15	Not listed	$0.47
MiniMax	`image-01-live`	Unchanged. Listed Nov 9. $0.0035 per image.	Per image	Not applicable	Per image

Vendor	Model ID	Status	Input	Cached	Output
OpenAI	`gpt-image-2.6-sunburst`	Unchanged. Image model listed Nov 4. Image tokens $8.00 input / $30.00 output / $2.00 cached; text tokens $5.00 input / $1.25 cached; no separate text output price listed.	$8.00	$2.00	$30.00
OpenAI	`gpt-image-2.6-flare`	Unchanged. Image model listed Nov 4. Same list prices as Sunburst: image $8.00 / $30.00 / $2.00 cached; text $5.00 / $1.25 cached.	$8.00	$2.00	$30.00
Mistral	`mistral-large-4`	Unchanged. Generally available since Nov 5. Named replacement for Mistral Medium 3.5 and Mistral Large 3. No cache-write price published.	$0.70	$0.07	$2.10
Tencent	`hy4`	Unchanged. Listed Nov 4. Same list price per Tencent's documentation. Billed at 50% of list through Dec 31 (Beijing time); start date not stated. Main price list not confirmed today.	$0.834	$0.042	$2.501
Google	`gemini-2.5-pro`	Deprecated (notice Mon Nov 2). From Tue Dec 1, requests route to gemini-3.8-flash and bill at its rates. Prices shown are for prompts up to 200K tokens.	$1.25	$0.125	$10.00
Google	`gemini-2.5-flash`	Deprecated (notice Mon Nov 2). From Tue Dec 1, requests route to gemini-3.5-flash-lite, whose text prices are the same.	$0.30	$0.03	$2.50
DeepSeek	`Search API / Fetch API`	Price unchanged at $0.75 per 1,000 each, including when deepseek-flash runs searches or fetches through its web tools.	Per request	Not applicable	Per request
OpenAI	`gpt-6-rosalind`	Unchanged. Limited to organizations approved for life sciences research. Cache writes: $18.75 (30-minute) or $37.50 (12-hour).	$15.00	$1.50	$75.00
OpenAI	`gpt-6-astra-law`	Unchanged. Promotional price through at least Dec 31.	$10.00	$1.00	$50.00
OpenAI	`FedRAMP endpoints`	In effect since Nov 1: 10% uplift on token prices. Standard global endpoint unchanged.	+10%	+10%	+10%
DeepSeek	`deepseek-flash (also serves deepseek-v4-flash)`	Off-peak price; unchanged. Peak-hour prices are double.	$0.15	$0.003	$0.60
DeepSeek	`deepseek-v4-pro`	Off-peak price; unchanged. Peak-hour prices are double.	$0.66	$0.022	$1.98
OpenAI	`gpt-6.1-terra`	Unchanged. Cache writes: $1.25 (30-minute) or $2.50 (12-hour). Prompts over 272K input tokens: 2x input and cache, 1.5x output, for the whole request.	$1.00	$0.05	$5.00
OpenAI	`gpt-6.1-sol`	Unchanged. Promotional prices through Nov 30; Terra costs half on every line.	$2.00	$0.10	$10.00

Vendor	Model ID	Status	Input	Cached	Output
Google	`Grounding with Google Search (Gemini 3 and newer)`	Unchanged. Daily cap of 1,500 requests; 5,000 free searches a month, then $14 per 1,000.	Per request	Not applicable	Per request
Moonshot	`Web search (Responses API and Kimi K3 built-in tool)`	Terms unchanged. Billed per search the server runs, plus model tokens. Per-call prices still not displayed; not confirmed.	Per call	Not applicable	Per call
Moonshot	`kimi-k3.1-pro`	Unchanged (standard rate). Cache writes: $2.00 (5-minute) or $4.00 (1-hour).	$2.00	$0.20	$10.00
Moonshot	`kimi-k2.7-code`	Unchanged price. Listed as deprecated; closed to new accounts; retirement expected late December.	$0.95	$0.19	$4.00
Moonshot	`kimi-k2.6`	Unchanged price. Listed as deprecated; closed to new accounts; retirement expected late December.	$0.95	$0.16	$4.00
Google	`gemini-3.8-flash (also serves gemini-3.7-flash)`	Labeled previous-generation. Standard tier unchanged through Dec 31; $1.50 / $0.15 / $7.50 from Jan 1, 2027. Replacement for gemini-2.5-pro from Dec 1.	$0.75	$0.075	$3.75
Alibaba	`qwen3.8-max`	Unchanged. International (Singapore) region.	$2.00	Not listed	$6.00
MiniMax	`MiniMax-M3.1-Flash`	Unchanged.	$0.15	$0.015	$0.60
Meta	`muse-spark-1.3`	Unchanged (Standard mode).	$1.25	$0.15	$4.25
Tencent	`Hy3`	Last confirmed Mon Nov 2. Not confirmed today. No cache-write price published.	$0.132	$0.033	$0.528
TypeSafe	`jev-1.14.0`	Unchanged. jev-latest points here. Output free.	$0.042	Not listed	Free
IBM	`granite-4-h-small`	Last confirmed price. Not confirmed today.	$0.0636	Not listed	$0.265

- No standard list token price changed on an existing generally available text or chat model since Friday's brief at any vendor I could confirm. Qwen4-Max is a new model, Tencent has published no price for Hy4 Flash, and Alibaba has published no price for qwen4-max-preview.
- Prices match the last confirmed figures at Anthropic, OpenAI, Google, xAI (Grok), DeepSeek, Moonshot, Z.ai, MiniMax, Mistral, Alibaba, Cohere, Meta, ByteDance, TypeSafe, StepFun and Perplexity.
- Prices from Amazon and Tencent's main price list could not be confirmed today (Tencent's Hy4 figures come from its documentation), Moonshot's per-search prices did not display, IBM's model list could not be confirmed, and Microsoft lists no pay-as-you-go prices. Their last confirmed prices stand, unverified today.

Google	`gemini-2.5-flash-native-audio-preview-12-2025`	Wed Mar 31, 2027 (time not stated)	`gemini-3.8-live`	Moved from Tue Nov 17.
OpenAI	`gpt-5.4-nano` `gpt-5.4-nano-2026-03-17`	Thu Apr 1, 2027 (time not stated)	`gpt-6-luna`	Unchanged. Also retiring that day: gpt-5.3-codex and gpt-5.1, with gpt-6-sol as their replacement.
OpenAI	`gpt-image-2` `gpt-image-2-2026-04-21`	Wed Feb 10, 2027 (time not stated)	`gpt-image-2.6-sunburst or gpt-image-2.6-flare`	Unchanged. Image model removed from the API.
Microsoft (Azure)	`Kimi-K2.6` `Kimi-K2.7-Code`	Fri Apr 16, 2027 (time not stated)	`None named`	Unchanged. Azure's date is later than Moonshot's own K2 retirement.
Mistral	`mistral-medium-3-5` `mistral-large-2512`	Fri Apr 30, 2027 (time not stated)	`mistral-large-4`	Unchanged. Deprecated Sat Oct 31; still callable until retirement. Prices no longer listed.
Microsoft (Azure)	`embed-v-4-0`	Tue Jun 1, 2027 (time not stated)	`Cohere-embed-v5-fast`, `Cohere-embed-v5-pro`	Unchanged.
Microsoft (Azure)	`Cohere-rerank-v4.0-fast` `Cohere-rerank-v4.0-pro`	Mon Sep 13, 2027 (time not stated)	`Cohere-rerank-v5-fast` `Cohere-rerank-v5-pro`	Unchanged.
Microsoft (Azure)	`gpt-oss-120b`	Wed Sep 15, 2027 (time not stated)	`None named`	Unchanged.
Microsoft (Azure)	`DeepSeek-V3.2` `DeepSeek-V3.2-Speciale`	Mon Nov 1, 2027 (time not stated)	`DeepSeek-V4.1-Flash` `DeepSeek-V4-Pro`	Unchanged.
Google	`gemini-3.1-flash-live-preview`	No shutdown date announced	`gemini-3.8-live`	Previously Tue Nov 17; Google now lists no date.
Anthropic	`claude-haiku-4-5-20251001`	Not sooner than Thu Oct 15, 2026; no date set	`None named`	Watch item. Still active with no date set.

Cohere	`command-r`
	`command-r-plus`
		Deprecated Sep 15, 2025; no shutdown date set	`command-r-08-2024`
			`command-r-plus-08-2024`
			`command-a-03-2025`
				Closed to new customers; existing users keep access until retirement.

- Retirement of two preview versions of Microsoft's Azure model-router (2025-05-19 and 2025-08-07) stands at January 27, 2027.
- Microsoft has pushed Azure retirement for gpt-5-mini (version 2025-08-07) and gpt-5.1 (version 2025-11-13) out to July 13, 2027. These Azure dates do not change OpenAI's own API dates.
- OpenAI's transcription notice is unchanged: whisper-1, gpt-4o-transcribe, gpt-4o-mini-transcribe, gpt-4o-transcribe-diarize and the /v1/audio/translations endpoint shut down February 26, 2027.

Price Tracker

Shares of the full tracked population.

- Tracked models: 1,934 (count as of October 25).
- Audited pricing, confirmed against the vendor's own published prices: 13.1% of the full tracked population.
- Unaudited pricing: 5.3%.
- The rest have no public per-token price (47.6%: self-hosted open weights, retired or unpublished) or are duplicate listings of another tracked model (34.0%).

Agent Platforms

Hosted AI agents that come with their own persistent cloud computer.

- **Grok Bot (xAI)**: its own persistent cloud computer. On the X Subscription it is included on Premium, Super and Ultra, draws from the same weekly usage pool as Cursor and the Grok apps, and prepaid credit covers usage past the pool. The latest release is v1.0.1 (dated November 11, and including 1.0.0): on Team, Enterprise and Ultra plans a Bot can join a Google Meet, Zoom or Microsoft Teams call from a link, answer in the meeting chat and send a summary afterward; Team Bots can join Microsoft Teams; owners and Managers can share their own app login as a shared connector; and the Voice menu adds a speed slider from 0.5x to 2x. Plan prices could not be re-checked today; last confirmed unchanged.
- **dots (OpenAI)**: not verified today. Last confirmed: a dot "has its own cloud computer," and the first comes with Pro and Business Premium at no extra cost.
- **Muse (Meta)**: "You and your Muse share your own dedicated computer in the cloud." Runs on Muse Spark 1.3, whose API price is unchanged at $1.25 input, $0.15 cached and $4.25 output per million tokens. Muse subscription billing could not be verified today.
- **Manus**: the Cloud Computer add-on is a persistent server billed separately at $30 a month (2 vCPUs, 4 GB RAM, 70 GB storage) or $50 a month (2 vCPUs, 8 GB RAM, 120 GB storage). No change.
- **Genspark Claw**: runs "on a dedicated cloud computer provisioned just for you," which requires a Lite, Standard or Powerful Cloud Computer subscription; Genspark publishes no dollar amounts on its help pages. No change to pricing.

All times Central. Vendor prices, dates and model IDs are as of 8:50 AM CT on November 16, 2026. Chart prices are as of November 16, 2026. Performance scores are as of October 16, 2026 and have not been refreshed since. Recently released models, including Claude Fable 5.2, Muse Ember 1.0, Gemini 4 Carbon, Gemini Decision, Gemini 4 Hydrogen and Qwen4-Max, are not yet in the charts. Price Tracker percentages are shares of the full tracked population; chart percentages are shares of active models. Items that could not be confirmed are marked unverified.

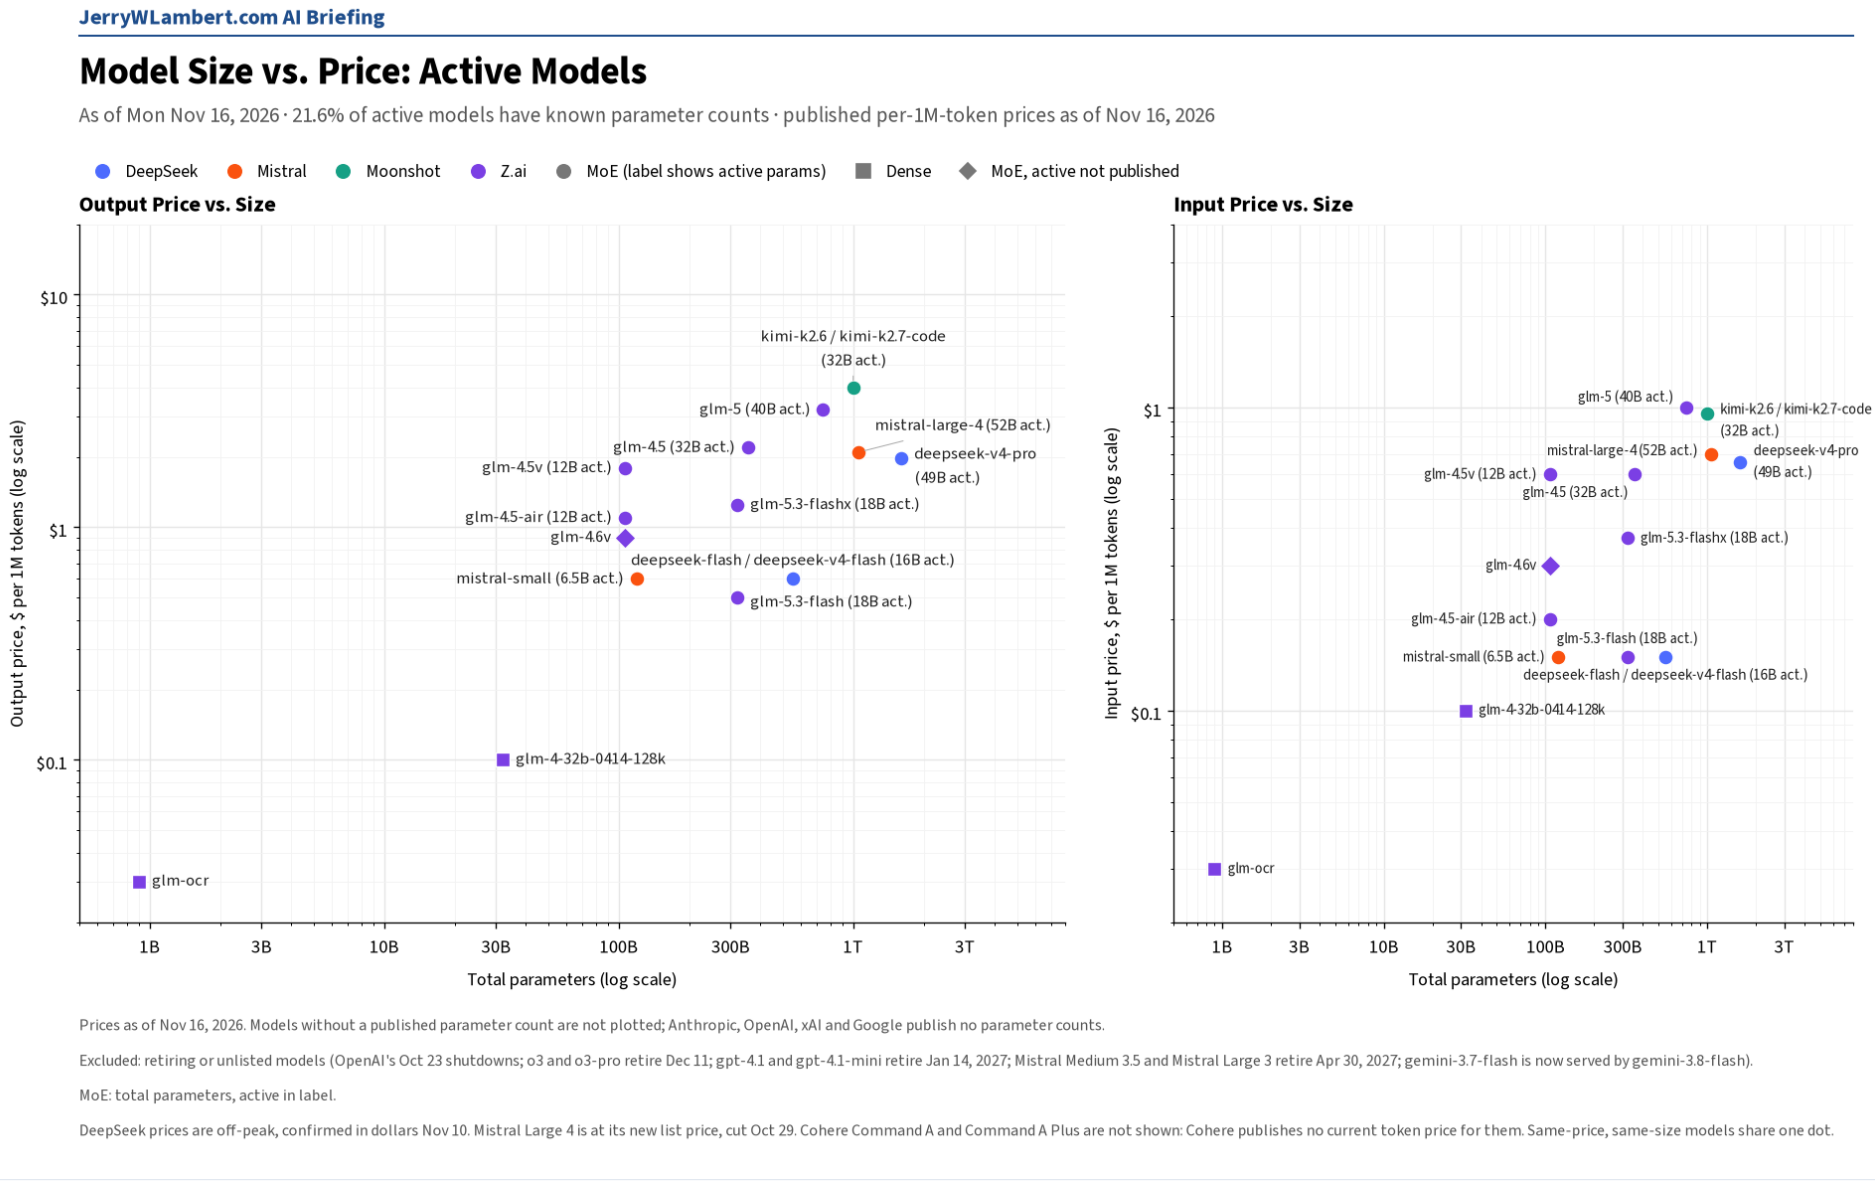
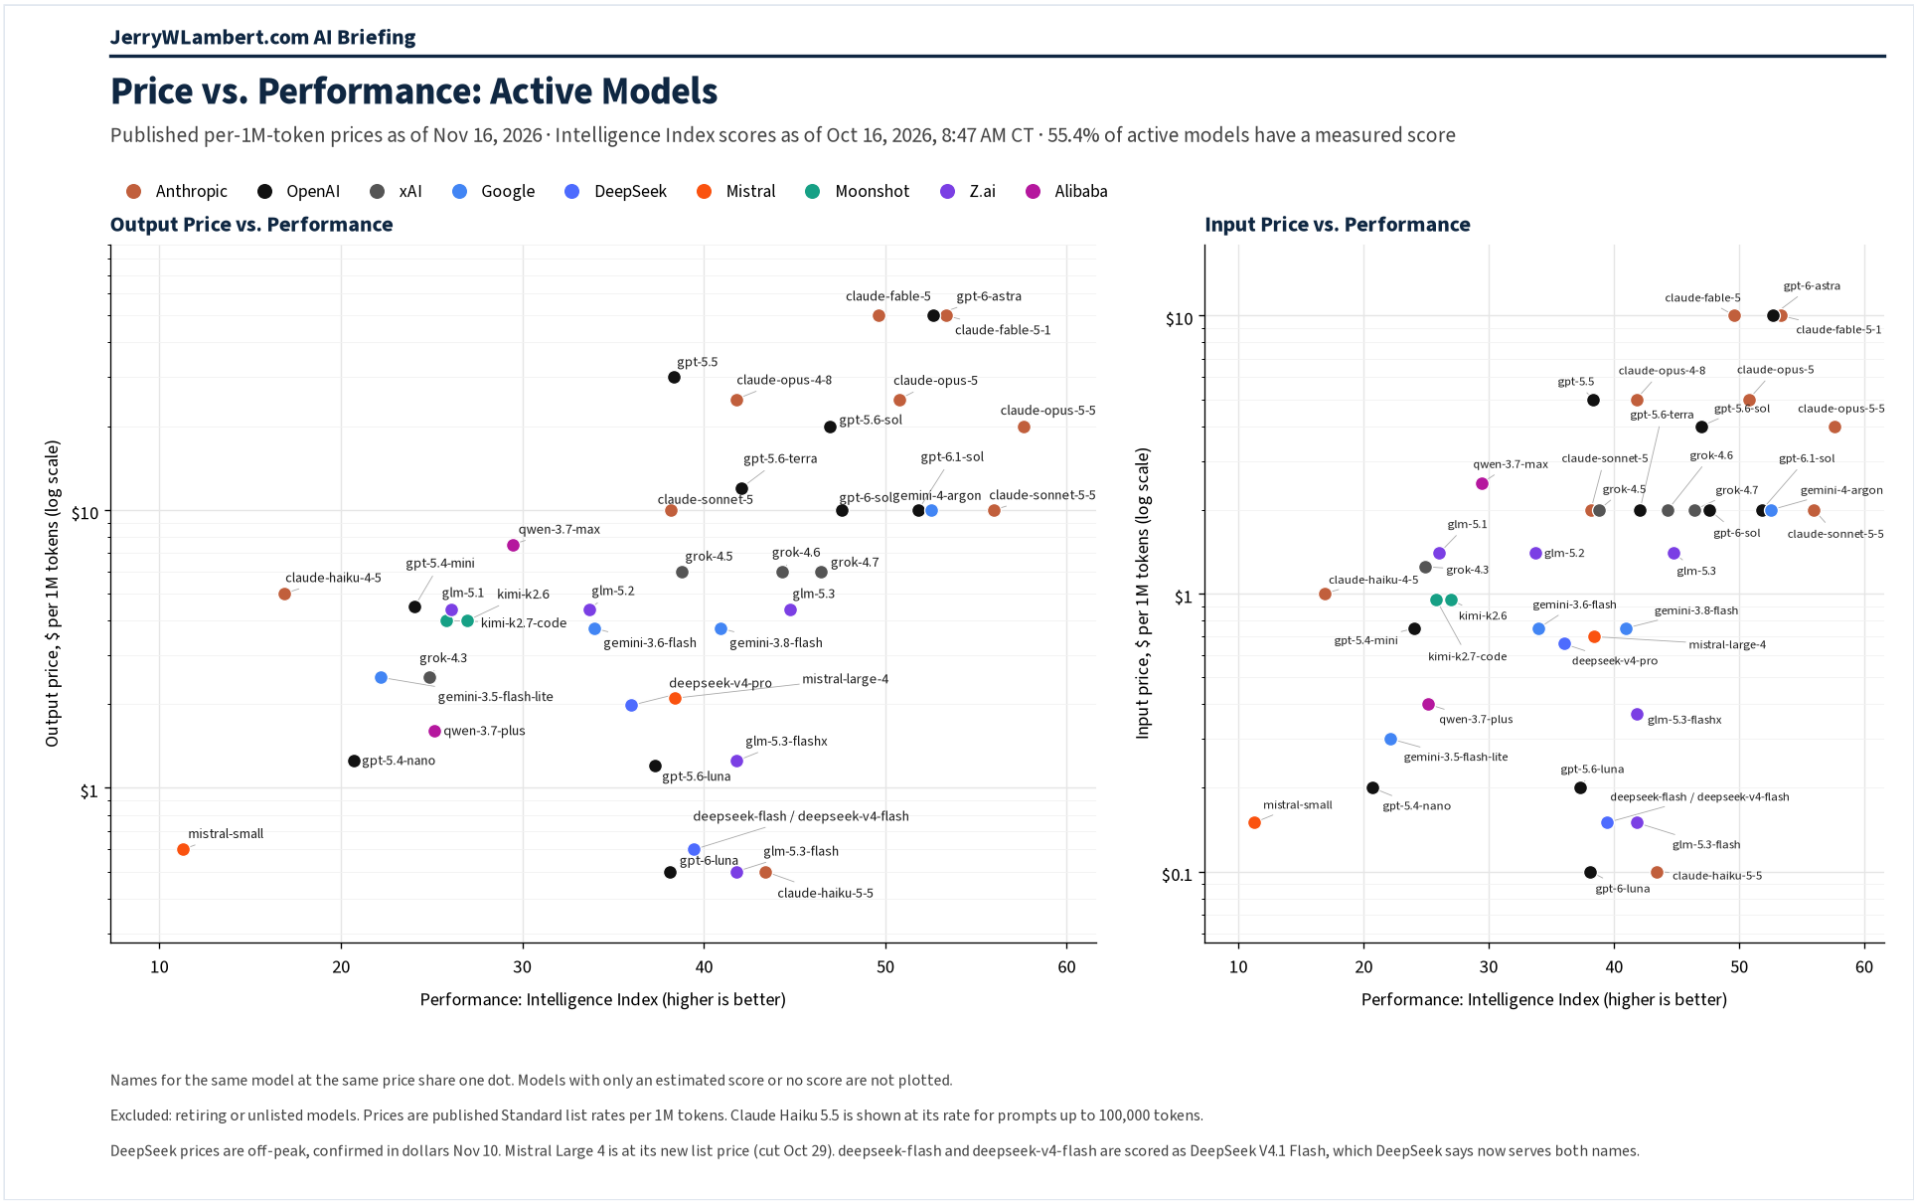
Model Size vs. Price



Among active models with a known parameter count (21.6% of active models), price rises with total size (rank correlation 0.69 on output price). No plotted price changed since Friday. Anthropic, OpenAI, xAI and Google publish no parameter counts, so their models are not plotted. Gemini 2.5 Pro and 2.5 Flash, now retiring, are not counted as active in either chart. Prices as of November 16, 2026.

Price vs. Performance



Among active models with a performance score (55.4% of active models), price rises with performance only loosely (rank correlation 0.55 on output price). Claude Haiku 5.5 leads at $0.50 or less (43.4). At the frontier, Gemini 4 Argon scores 52.6 and GPT-6.1 Sol 51.8, each at $10 output, while xAI's Grok 4.7 scores 46.5 at $6. Scores as of October 16, 2026 (not refreshed since); prices as of November 16, 2026.
